

Wingspan Bird Tours

Trip Report

Lesvos 28th April - 5th May 2012

Leader Bob Buckler

Participants:

Christine & John Sutherland
Gordon Caw
Barbara Priest
Mary-Rose Fry
Jeanne Pendrill
Steve & Sylvia Lees

Summary

Our group of 8 enjoyed a wonderful week in sunny Lesvos, in fact it was a little too sunny at times, the temperature rose to nearly 30^D C on a couple of days which made the birding very tiring! But we had a great time, leisurely days and plenty of birds to see. Highlights included a **Pygmy Cormorant** at Dipi Larisos on day one, two **Great Spotted Cuckoos**, 2 beautiful male **Collared Flycatchers** at Meladia, a very showy **Long-eared Owl** with **Scop's Owls** sitting in the next tree. Hundreds of terns, waders, egrets, ibis and herons on the Alykes wetlands. Even our last day produced excitement in the shape of a **Dalmatian Pelican**, a rare visitor to Lesvos; we saw one at the Kalloni Salt Pans. We had great views of most of the Lesvos 'specials': **Kruper's Nuthatch**, **Cretzschmar's & Cinereous Buntings**, **Rufous Bush Robin**, **Masked Shrike**, **Western Rock Nuthatch** and many more.

DAY 1 - SATURDAY APRIL 28TH

GATWICK TO MYTILINE – SKALA KALLONI VIA DIPI LARISOS MARSHES. LATER WE VISITED: – SKALA KALLONI – TSIKNIAS RIVER AND KALLONI SALT PANS

BIRD OF THE DAY - PYGMY CORMORANT

But also high on the list; Temminck's Stint, Little Bittern and good numbers of Squacco Herons.

The group met at Gatwick Airport in preparation for the direct flight to Mytiline, Lesvos. Everything went smoothly at both airports and by 2:30pm local time we were on our way to our hotel in Skala Kalloni which is situated in the centre of the island. The weather was superb, a clear sky a little breeze and a temperature of 21C.

A VIEW UP THE TSIKNIAS RIVER

A VERY CONFIDING LITTLE BITTERN

We saw **Hooded Crow**, **Barn Swallow** and **Yellow-legged Gull** as we worked our way through Mytiline town and before long we were on the highway heading out towards the Gulf of Gera. There was one short stop planned en-route and that was at Dipi Larisos Reed-beds which are found on the Gulf of Gera and where a pair of **Pygmy Cormorants** had been reported.

Sure enough one of the birds was present when we arrived, a super bird for our tour list and a lifer for me, it was a little too distant to photograph. At the same place we found **Great Cormorant**, **Spanish Sparrow**, **Yellow Wagtail** and we heard a **Cetti's Warbler**.

We arrived at our hotel at 4pm and after a short settling in period we set off for our first birding excursion on this superb island. In Skala Kalloni we stopped to admire a beautiful **Squacco Heron** seen in a ditch, it was in full breeding plumage and the afternoon sun made it look exquisite. Along the track to Tsiknias River we found 9 more **Squaccos**, a lot of **Wood Sandpipers** and more **Yellow Wagtails**. We also found several **Corn Buntings**, **House Martins** and **Sand Martins**. At the river we found an **Oystercatcher** which is a good species for the Lesvos list. There was also **Common Terns**, **Little Terns**, **Wood Sandpipers**, but the star of the show was a magnificent adult **Black Stork**.

Upriver at the ford we spent some time watching a **Little Bittern** feeding, with its ridiculously long neck it would lean from its reedy perch and snatch food from the water. Also at the ford were many more **Wood Sandpipers** (30+), **Little Ringed Plover** (2), **Temminck's Stint** (2), **Reed Warbler**, **Whinchat** and another **Black Stork**. Lots of **Yellow Wagtails** were also feeding at the ford, we saw **Black-headed**, **Blue headed** and **Grey Headed**. A little further upriver we came across a party of 8 **Gull Billed Terns**, they were feeding in a small pool area.

Lastly we paid a visit to the salt pans, it was a brief stop to look for a reported **Baillon's Crake** which failed to show, however we enjoyed great views of **White-winged Terns**, **Gull-billed Terns**, **Kentish Plover**, **Greenshank**, **Common Sandpiper**, **Black-headed Wagtail**, 2 more **Black Storks** and we had distant views of **Avocet** and **Greater Flamingo**. This finished off our day nicely so we drove back to the hotel in readiness for our 7:30pm dinner.

What a great start to our first day, we only saw 40+ species of birds, but there was good feeling in the group about future sightings and a lovely atmosphere at dinner.

DAY 2 – SUNDAY APRIL 29TH

SKALA KALLONI - KALLONI SALT PANS - UPPER TSIKNIAS RIVER

BIRD OF THE DAY - CITRINE WAGTAIL

What a superb start to the holiday the weather was fantastic and the setting idyllic. We surfaced at 6:30am and we were greeted by a clear blue sky, no breeze but with a little chill in the air.

We spent the day 'locally' visiting both rivers that form the east/west boundaries either side of Kalloni and we put a lot of time in at the salt pans further to the east. Our pre-breakfast outing started at 6:30am and took in the Christou River and surrounding salt marsh.

CITRINE WAGTAIL

GARGANEY

We found **Stone Curlew** and several species of wader, a **Little Stint** was the only new one for our list.

The rest of the morning was spent in and around the Salt Pans. We listed over 80 species and some of the highlights were: **Garganey, Glossy Ibis, Great White Egret, Collared Pratincole, Whiskered Tern, Red-throated Pipit, Tawny Pipit, Lesser Grey Shrike, Black headed Bunting, Short-toed Lark, Gull-billed Tern, White-winged Tern** and tons of waders the best of which was **Temminck's Stint**. Not a bad list of goodies!!!

We also visited the east side of the salt pans where we found two **Citrine Wagtails**, great birds but very flighty and difficult to photograph

Another site we visited was a track that follows the upper stretch of the Tsiknias River, along there we found **Hoopoe, Woodchat Shrike, Black-eared Wheatear** and several raptors drifted over which included: **Short-toed Eagle (4), Long-legged Buzzard, Pergerine Falcon** and **Hobby**.

Lastly we visited the lower Tsiknias River and near the ford we found **Temminck's Stint (4), Little Bittern (2)**, plenty of **Wood Sandpipers, Little ringed Plovers, Black Stork, Common Nightingales, Olivaceous Warblers, Bee-eaters** and a host of other species. At the river mouth we saw 5 **Mediterranean Gulls**. Before we finished for the day we visited a site in the middle of Papina, the next village to Skala Kalloni, where we had great views of both **Scop's Owl** and **Long-eared Owl**. The LEO was positioned in the dark and so I was unable to obtain a digi-scope picture.

DAY 3 - MONDAY APRIL 30TH

PARAKILO CHAPEL - AGRA - SKALA ERESOS - ERESOS TO SIGRI COAST ROAD VIA MELADIA VALLEY

BIRD OF THE DAY: COLLARED FLYCATCHER

Keep it coming!!! Another great day of birding in superb weather, the only downside is the lack of migrants because of the 'good' weather, there were many species but not many of each.

We started early at 8am heading for Sigri by taking the coast road along the north side of the Gulf of Kalloni. Our first stop was at the Chapel just west of Parakilo where we found a number of nice species. Our first **Cretzschmar's Bunting** was exciting for the group but the beauty of the **Cirl Bunting** was equally admired. A **Blue Rock Thrush** sang from the top of a spruce tree, a pair of **Common Whitethroats** chased one another around and at least three **Black-eared Wheatears** flitted about one the rocky slopes. More distant birds included a **Short-toed Eagle** (carrying a snake), a **Golden Oriole** seen briefly and a **Common Kestrel** hovering over the hillside.

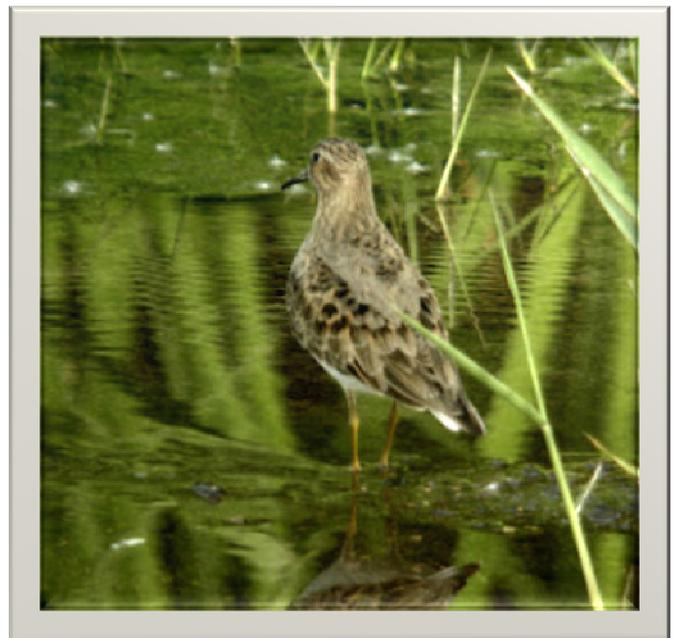

A brief stop at the 'towers' above the town of Agra produced our first **Western Rock Nuthatch**, more **Blue Rock Thrushes** and **Black-eared Wheatears**. Then just a couple of kilometers along the road we stopped to

watch soaring raptors, three of which were **Eleanora's Falcons** and one a **Short-toed Eagle**.

At Skala Eresos we were very lucky to find a nest of the **Penduline Tit**, it was still under construction and we enjoyed watching the birds collecting nesting material from the nearby reed mace. Other birds seen included great views of **Common Nightingale** and roosting **Night Herons** as well as **Olivaceous Warbler**, **Reed Warbler** and we heard a couple of **Cetti's Warblers**.

TEMMINCK'S STINT

From Eresos we took the coast track through the Meladia Valley, we spent a good 3 hours during several stops including a picnic lunch break. Over the whole valley and the ford area we listed a number of great species, the best of which were: **Collared Flycatcher** (2), **Barred Warbler**, **Orphean Warbler**, **Subalpine Warbler**, **Whinchat** (6), **Masked Shrike** (1), **Red-backed Shrike** (24), **Woodchat Shrike** (8), **Spotted Flycatcher** (18), **Pied Flycatcher** (2), lots of **Black-headed Buntings**, **Cretzschmar's Buntings** and a couple of **Little Owls**.

We drove through Sigri and up through the hills back towards Kalloni via Andissa. Along the road above Sigri we saw 8 **Lesser Kestrels** feeding over the hillside. At the Eresos crossroads we found a couple of **Isabelline Wheatears** and a **Middle Spotted Woodpecker**.

Back at Kalloni at 6pm we decided to have a quick look at the Tsiknias River, a good decision, as we found some great birds. New for the trip list were **Montagu's Harrier** and **Red Footed Falcon** but we also enjoyed **Temminck's Stint** (4), **Little Bittern** (3), lots of **Squacco Herons**, **Wood Sandpipers**, **Little Ringed Plovers** and **Yellow Wagtails**. The evening light was superb and we didn't want to leave this magical scene, but we had to go back to the hotel for dinner.

DAY 4 – TUESDAY 1ST MAY

KALLONI RAPTOR WATCH POINT - PETRA (KAVAKI) - PETRA RESERVOIR - EFTALOU - NAPI VALLEY - KALLONI SALT PANS

BIRD OF THE DAY: LITTLE CRAKE

It got too hot today, up to 30 C during the afternoon, a very slow birding day with nothing major to report. We set off at 6:15am to Metochi Lake just north of Kalloni. We saw 5 **Little Crakes**, one or two showed extremely well and the group had excellent views. Not much else was on show.

GREAT WHITE EGRET - SHOWING ITS FACIAL BREEDING PLUMMAGE

After breakfast we set off towards Petra on the north coast of the island. We stopped at the well known raptor watch point called the 'Bandstand'. From there we saw **Goshawk**, **Sparrowhawk**, **Long-legged** and **Honey Buzzard**, **Short-toed Eagle**; **Black Stork** and a couple of **Peregrine Falcons**. On the ground we had good views of **Cirl** and **Cretzschmar's Bunting**, **Blue Rock Thrush**, **Black-eared Wheatear** and we heard a **Woodlark** singing.

At Petra we stopped at Kavaki on the coast road and spent a nice hour watching **Ruppell's Warblers** on two breeding territories. We also found **Subalpine Warbler**, **Orphean Warbler**, **Turtle Dove** and **Blue Rock Thrush**.

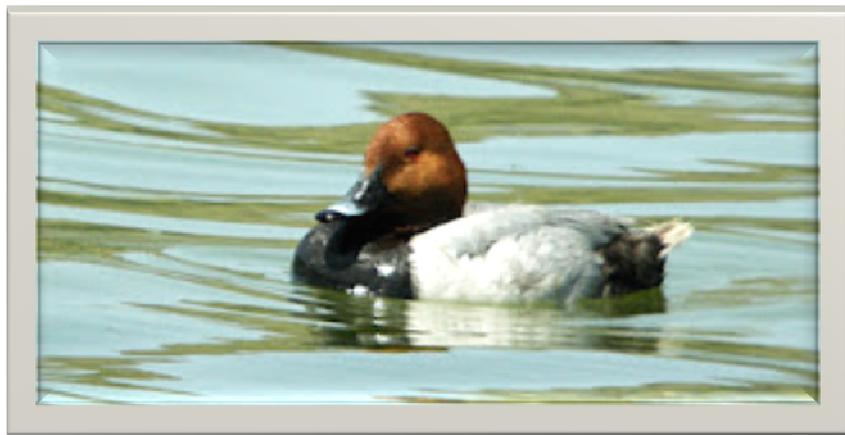

Other birds seen on the reservoir near Petra were; **Ruddy Shelduck** and a **Grey Heron**. We ate our lunch on the beach at Eftalou, it was cooler there, we saw a **Shag** and several groups of **Yelkouan Shearwaters**.

The afternoon got really hot, we spent our time in the shade of trees whilst looking for raptors and woodland species along tracks in the Napi valley; we found **Red-footed Falcon**, **Hobby**, **Common Buzzard**, **Short-toed Eagle**, **Raven** and a **Common Kestrel**. Woodland species included: **Sombre Tit**, **Hoopoe**, **Common Cuckoo**, **Turtle Dove** and lots of common species.

At the Salt pans we saw all the usual species with notable additions of: **Collared Pratincole** (2), **Red-footed Falcon** (8), **Black Stork**, **Garganey** (2) and **Stone Curlew**.

We got back to hotel at 7pm. it had been a long hot day, but we enjoyed it immensely and logged nearly 100 species!!!

You may ask why is there a picture of Common Pochard in this report? Well, we saw one on Petra Reservoir and it was only the 10th record of this species for Lesvos!!!

THE GROUP STANDING ON THE KREMASTES BRIDGE,
8 METERS FROM THE GROUND (16TH CENTURY)

DAY 5 - WEDNESDAY MAY 2ND

ACHLADERI - DIMITRIOS - VATERA - AGIOS FOKOS - KALLONI SALT PANS - TSIKNIAS RIVER

BIRD OF THE DAY - KRUPER'S NUTHATCH

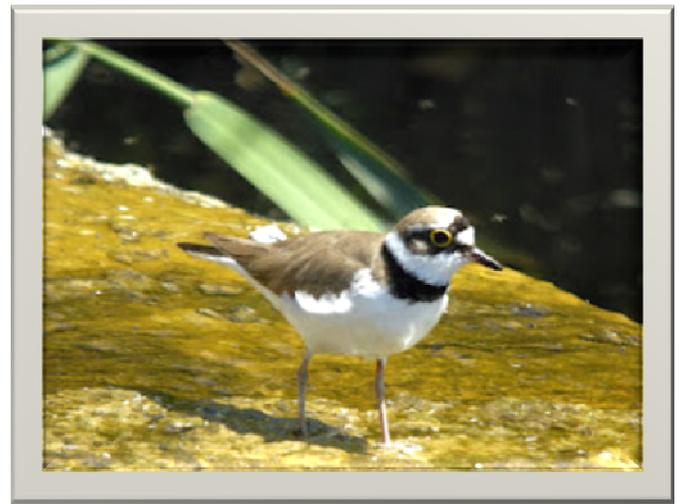

KRUPER'S NUTHATCH (PHOTO BY STEPHEN LEES)

It got hotter still today and there was hardly a breeze, so we took it very leisurely and kept mainly to woodland birding.

We set off from the hotel at 8am and drove directly to Achladeri to the pine woods where the **Kruper's Nuthatch** breeds. After a short walk into the forest we found a beautiful **Woodlark**, it was carrying food for its young.

LITTLE STINT

LITTLE RINGED PLOVER

We also saw **Cirl Bunting** and we heard a **Common Cuckoo**. We worked our way deeper into the wood until eventually we found a **Kruper's Nuthatch**, it was also carrying food, we watched it drop down to a nest hole (see picture above) where we all enjoyed great views. Whilst watching the Nuthatch we found a pair of **Short-toed Treecreepers** which were feeding in nearby trees.

From Achladeri we drove up the mountains to Dimitrios where we spent some time looking for more woodland species we also stopped for coffee. Species found included: **Serin, Wren, Red-rumped Swallow, Crag Martin, Short-toed Eagle, Common Buzzard** and **Long-legged Buzzard**.

WOODLARK

At Vaterea we had a great time on the bridge over the Alimortopatos River just west of this lovely seaside town. Just below the bridge on the concrete weir we found a superb **Citrine Wagtail**, a **Little Stint**, a

SERIN

Common Sandpiper and a **Little Ringed Plover**. We drove a short way upriver and took lunch by a ford where we watched both **House** and **Spanish Sparrows** bathing with **Goldfinch** and **Black-headed Bunting**. Whilst eating our food an **Olivaceous Warbler** sang from a nearby bush and a **Little Bittern** flew across the reeds.

At the small headland at Agios Fokos we saw both **Yelkouan** and **Scolopi's Shearwaters** out in the bay, a couple of **European Shag** on the rocks and on the land

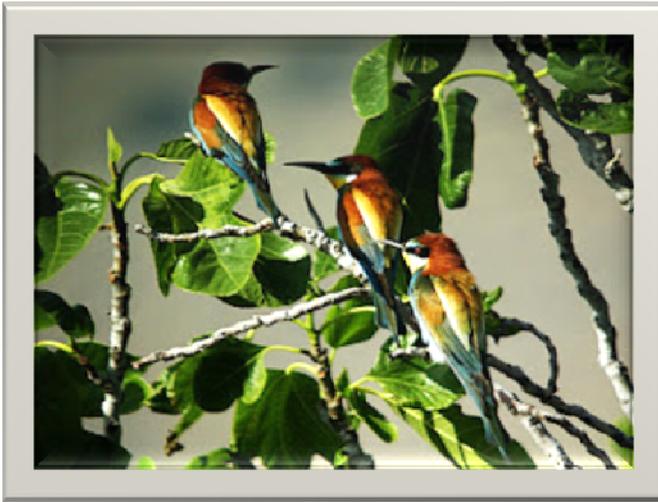

we watched **Sardinian Warblers**, **Whinchat**, **Woodchat Shrike**, **Red-backed Shrike** and more **Black-headed Buntings**.

We headed back to Kalloni at 4pm making a brief stop at Makara Marshes where we saw a couple of **Purple Herons**, **Squacco Heron**, **Ruddy Shelduck** and a **Little Grebe**. Our tour of the Salt Pans finished off the day; we saw many of the usual species and added **Marsh Sandpiper** to our trip list. Last port of call was the mouth of the Tsiknias River where two **Oystercatchers** were joined by a **Ruddy Turnstone** which was also a new species for the trip. We finished at 7pm - it was a long day but it we all thoroughly enjoyed it.

LESVOS - 7 DAY TOUR - DAY 6 - MAY 3rd 2012

TSIKNIAS RIVER - FILA RADIO MAST - IPSILOU MONASTERY - SIGRI FIELDS - MELADIA VALLEY

BIRD OF THE DAY - CINEREOUS BUNTING

The blistering heat continues, which is making birding very difficult. A stronger breeze was present all day which brought the temperature down but we still got hot.

Our day started at 8am as we left the hotel and headed for the Tsiknias River to look for a **Spotted Crake** that had been reported the night before. After a short while we found the crake but only half the group saw it before it walk into cover. A couple of **Wood Sandpipers** were there too.

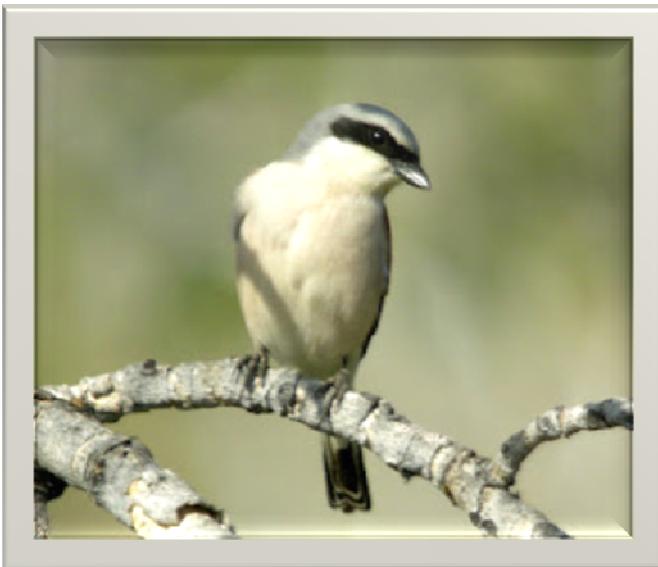

EUROPEAN BEE-EATERS

Our main destination for today was the Fields at Sigri so we set off through the centre of the island heading for Dafia and then to Filia. At Filia we pulled over near the radio mast where a lovely area of oak woodland is found. Our target bird was the **Eastern Bonelli's Warbler**, we heard at least 3 singing and we had good views of one of them. Other species found in the woodland were **Subalpine Warbler**, **Orphean Warbler**, **Cirl Bunting** and **Jay**. We heard **Turtle Doves** and **Golden Orioles** and a **Hobby** flew over us just before we left.

A few miles out of Vatousa we stopped in the canyon at Lardia to look for **Rock Sparrows** which were very obliging, there were also **Red-rumped Swallows**, **Crag Martins**, **Black-eared Wheatears** and a **Blue Rock Thrush**.

RED-BACKED SHRIKE

Passing through some wonderful scenery our next stop was the monastery at Ipsilou, this active, 'silent order' monastery is perched on the top of a high pinnacle of rock and all the slopes are covered in oak woodland, which is, under normal weather conditions, a magnet for migrant warblers. Today it was barren, during our 2 hour stop we only found a couple of **Blackcaps** and half a dozen **Spotted Flycatchers**. The disappointment was counteracted

with good views of **Cinereous Bunting**, **Rock Nuthatch**, **Little Owl**, **Eurasian Nuthatch** and lots of **Black-eared Wheatears**.

The Sigri fields proved to be the same, devoid of migrants, although the wind there didn't help. We heard a few **Golden Orioles**, saw several **Woodchat** and **Red-backed Shrikes** and during one walk we found **Orphean Warbler** and **Olivaceous Warblers** both in full song. Other species seen included a singing **Masked Shrike** (this confused some of the group as such a sweet melodic sound wasn't expected from a shrike), we also found **Wood Warbler**, **Lesser Kestrel**, **Turtle Dove** and **Black-headed Wagtail**.

We returned home the long way round taking the dirt track from Sigri to Eresos, a couple of stops in the Meladia valley produced a few more birds. At the small chapel near the ford we found a stunning **Wood Warbler**, **Pied Flycatcher** (2), **Spotted Flycatcher**, **Common Whitethroat** and a **Marsh Warbler** was singing from the deep scrub.

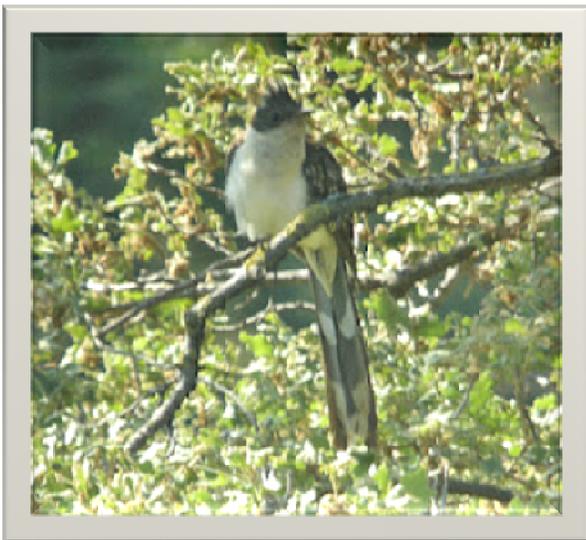

At the fig plantation we had a good time watching **European Bee-eaters**, there were also plenty of flycatchers but not much else.

It had been a long day out as we arrived back at the hotel at 7pm. I think the scenery of this beautiful island had been just as enjoyable as the birding today!

LESVOS - 7 DAY TOUR - DAY 7 MAY 4TH 2012

TISKNIAS RIVER - MADAROS - NAPI VALLEY - PLANTANIA - MESA - KALLONI SALT PANS - TSIKNIAS RIVER

BIRD OF THE DAY - GREAT SPOTTED CUCKOO

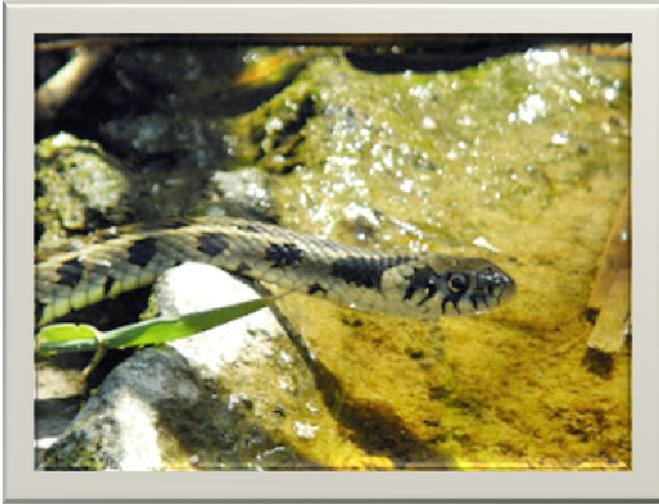

Our last full day and another fantastic one, wall to wall sunshine, the wind had shifted to the north so it was a little cooler.

We set off at 8am in search of new species to add to our list, but before we did that, we visited the Tsiknias River to try to see the **Spotted Crake** for a second time as some of the group never had good views of it the first time around. Unfortunately the bird had gone, but we did see **Great Reed Warbler**, **European Bee-eater** and a good number of **Wood Sandpipers**.

We then took a track from the Upper Tisknias River to Madaros where we searched for a **Rufous Bush Robin**. As

soon as we got out of the bus we heard it singing and quickly located it on the top of a bush, great result, a smashing bird. We also had good views of **Cirl Bunting**, **Black-eared Wheatear** and a **Long-legged Buzzard** flew over.

We then drove round to the Napi Valley and stopped just after the village of Napi. The air was full of bird song and it wasn't long before we found some good species. The best was, of course, the **Great Spotted Cuckoo**, we found two of them and had great, extensive views of them. Other species seen were **Hoopoe, Masked Shrike, Turtle Dove, Sombre Tit, Middle Spotted Woodpecker, Woodlark, Jay, Long-legged and Common Buzzard** and lots of the more common species.

GRASS SNAKE

Following the excitement of the cuckoo we visited an area called Platania where we hoped to see **Olive-tree Warbler.** After an hour or so we gave up, not a single bird was seen or heard. The **Olive Tree Warbler** is a late arriving migrant which normally arrives during the first few days of May, obviously late this year.

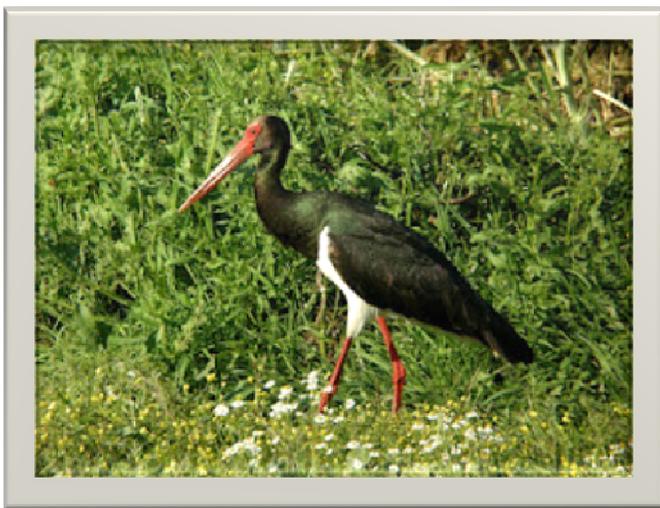

We drove back to Kalloni and on to Mesa where we sat on a bridge overlooking the marsh whilst we ate our picnic lunch. The marsh held several species, **Squacco Heron and Purple Heron, Wood Sandpiper, Ruff, Little Stint, Ruddy Shelduck, Little Egret** and a few pairs of **Black-winged Stilts**.

We then followed the road along the south of the Kalloni Bay passing Achladeri and into some olive groves where we stopped and looked for **Olive Tree Warbler**, again. However none were calling, we did see plenty of **Masked Shrikes, Bee-eaters, Olivaceous Warbler** and a **Raven**.

It was now late afternoon so we drove back to the hotel in Skala Kalloni where some of the group decided to call it a day. The rest of us decided to have a mini bird-race and set off to find 50 species in 3 hours and only visiting areas around Skala Kalloni.

We achieved our goal in 2 hours 30mins by visiting both the Tsiknias and Christou rivers and the Salt Pans. We had great views of **Long-eared Owl** which one of our first birds. At 7pm we concluded the birding for the day.

Saturday 5th May. Kalloni Salt Pans - Skala Kalloni – Mytiline Airport.

Some of the group decided to go out early on the last morning and the others took a leisurely walk around the village and the hotel grounds.

Our outing at 6:30am was to the salt pans at Kalloni where a **Dalmatian Pelican** had been seen the previous night coming in to roost. Sure enough there it was sitting like a giant prehistoric bird amongst the much smaller **Avocets**. We saw it in flight a couple of times and a bit later it was sitting on the dead-calm sea in Kalloni Bay.

BLACK STORK

In the meantime we spent some time looking into the flooded field behind the pans, it was full of birds. There were a good variety of waders as well as herons and egrets, but no **Glossy Ibis**. Over the hour our highlights were: a single **Garganey, Spotted Redshank**, summer plumaged **Curlew Sandpipers, Little Stint**, a huge number of

Ruff, 2 Greenshank, Avocets, Black-winged Stilts, Ruddy Shelduck, Little Ringed Plover. There were lots of **Squacco Herons** which looked fabulous in the early morning light, as the orange hues enhanced their beautiful plumage. Flying over the pools were good numbers of Terns, **Common, Little** and **White-winged** as well as several **Whiskered Terns**.

We set off back to hotel for an 8am breakfast before departing for the airport at 9:30am. One last stop at Dipi Larisos along the way to the airport proved fruitless as we search for a **Spur-winged Plover** that had been reported on a number of occasions over the last few days.

After checking-in our hold luggage we were able to sit on the beach and watch **Scolopi's Shearwaters** in the distance and the last bird of note for the trip list was a **Honey Buzzard** that drifted over the distance hills beyond the airfield. Our flight was on time and we arrived back in London mid-afternoon, it was 9C and raining, oh..... to be back on a Greek Island in 25C again.....I am looking forward to next year's trip already.

All sightings over the period - 28th April - May 5th 2012

	SPECIES	SCIENTIFIC NAME	
1.	Great Crested Grebe	<i>Podiceps cristatus</i>	√
2.	Little Grebe	<i>Tachybaptus ruficollis</i>	√
3.	Scolopi's Shearwater	<i>Calonectris scolopi's</i>	√
4.	Yelkouan Shearwater	<i>Puffinus yelkouan</i>	√
5.	Dalmatian Pelican	<i>Pelecanus crispus</i>	√
6.	Great Cormorant	<i>Phalacrocorax carbo</i>	√
