DAY 1 - APRIL 15th 2012

GAUCIN - GRANADA - MALAGA – GAUCIN

I had a busy day today!!!! I left Gaucin at 6am to collect Kenneth & Katherine from the centre of Granada; they are from Toronto and will be joining us for a week. We then drove to Malaga Airport to meet Ken & Margaret arriving from the UK, they are also staying for a week.

We all then set off for a quick look at the Desembocadura at the Rio Guadalhorce, It was clear but a cold wind was blowing quite strongly. We limited our visit to viewing from the embankment where we saw **Kentish Plover, Common Sandpiper, Yellow-legged Gull, Goldfinch, Spotless Starling, Serin, Zitting Cisticola, Barn Swallow, House Martin and Pallid Swift.**

We made the usual stop at Sierra Crestellina on the way up to Gaucin from the coast, there, despite the windy conditions, we found several **Griffon Vultures, Corn Bunting, Stonechat** and we had great views of a **Bonelli's Eagle** which eventually, after flying around the mountain for a while, flew down to its nest (eyrie?). We noticed a group of vultures landing on the hillside behind us, so we turned the bus around and headed off to see them, unfortunately they all flew off as we approached. There was a carcass of a sheep left lying there.

We then spent a little time at the Rio Genal where we found **Grey Wagtail, Chaffinch, Cirl Bunting, Wren, Robin** and we heard a **Cetti's Warbler**. Rain drove us off; we ended up at Gaucin at 4pm and called it a day.

We were joined by Ivan and Muriel as we all assembled at 7:30pm for one of Dawn's delicious dinners. We now had a full group of 6 all eager to start a 7-day tour of Andalucia. The official start of the tour is tomorrow morning - watch this space.

DAY 2 - APRIL 16th 2012

GAUCIN CORK WOODS - RIO GUADIARO - MONTEJAUQUE (DAM) - MONTEJAUQUE CORK WOODS.

A very windy day with a clear sky had us all scrambling for our warm fleeces, scarves and gloves. In actual fact it was very warm in the sheltered areas of the woods but most of us kept on our coats for the whole day.

We set off at 8:30am and headed north towards Ronda from Gaucin and after a couple of clicks we stopped near the Plaza de Torro - Gaucin's defunct Bull Ring. We quickly found a **Eurasian Nuthatch** and then plenty of **Blue** and **Great Tits**, **Chaffinches** and **Serins**. But not much more after that, a party of **Long-tailed Tits** were nice, we saw a **Mistle Thrush** flash by, a **Sparrowhawk** circled above us and several **Griffon Vultures** drifted over.

Our walk along the Rio Guadiaro at Estacion de Cortes was much more rewarding. The river held **White Wagtail**, **Grey Wagtail** and

Little Ringed Plover, there were half a dozen **Common Nightingales** singing and at least one was seen by some of the group. We watched **Blackcaps**, **Girl Bunting**, **Garden Warbler**, **Woodchat Shrikes**, **Mistle Thrush**, **Rock Sparrows**, **Short-toed Treecreeper**, **Stonechats** and **Barn Swallows**. In the sky we found **Booted Eagle**, **Griffon Vultures** and we had great views of **Short-toed Eagle**. During our walk we had tantalising short views of **Hawfinch** but as we ate our picnic lunch at the end of the walk we had good prolonged sightings of a male.

Around 1pm we drove up through Cortes and on to Montejaque where we visited the area behind the 'dam that doesn't work'. In the rocky scree we found **Black Wheatear**, **Blue Rock Thrush** and below us in the more open area we saw **Southern Grey Shrike**, **Linnet**, **Spotless Starling** and more **Stonechats**.

Our last port of call was the cork wood above Montejaque, which was a little disappointing. We only saw **Eurasian Nuthatch**, **Chaffinches**, **Blue Tits**, **Great Tits** and a few **Greenfinches**. We did hear a **Bonelli's Warbler** & **Wood Pigeon** but we never saw them. Back at the bus we watched a pair of **Red-rumped Swallows**, gracing the sky with their elegant flights of fancy.

A few butterflies added to our enjoyment of the beautiful mountainous-habitat, we saw **Small White**, **Scarce Swallowtail**, **Speckled Wood**, **Large Tortoiseshell** and **Green Hairstreak**.

One last stop produced another **Short-toed Eagle** and a **Red-legged Partridge**, we arrived back at Gaucin at 5pm, the wind had dropped off and the sun was now very warm. The tally for the day was only 52 species; I blame the windy conditions not the bird guide for such a low a total!

DAY 3 - APRIL 17th 2012

GAUCIN - PELAYA - LOS LANCES BEACH - LA JANDA - VEJER - BARABTE MARSHES - SIERRA DE LA PLATA (BOLONIA) - LOS LANCES BEACH PART ii.

CREAM-COLOURED COURSER - BIRD OF THE DAY

A big improvement in the weather today, it got much warmer, the wind reduced and there was very little cloud cover. After our breakfast we drove down to the coast via Casares where we collected Penny Hale who was joining us for the day.

Our first stop was in the hills between Algeciras and Tarifa. We stopped for a walk through a park just above Pelaya. It was a bit breezy up there which kept many species out of sight but there were many **Common Nightingales** singing, a **Common Cuckoo** called in the distance and we found **Blackcap, Cirl Bunting, Serin, Stonechat, Griffon Vulture** and **Short-toed Eagle**.

The westerly wind wasn't conducive to raptor migration so we didn't stop at the 'migration watch points' and went straight to Los Lances Beach. Unfortunately there were many joggers, dog-walkers and strollers on the beach so not many birds were present;

the same applied to the grass meadows behind the beach. We saw a flock of 10 **Whimbrels** and smaller numbers of **Sanderling, Dunlin, Curlew Sandpiper, Kentish Plover** and a single **Yellow-legged Gull**. On the grass meadows we found: **Short-toed Larks, Crested Larks, Northern Wheatear** and more **Kentish Plovers**, the whole area was a bit disappointing.

The same can be said about La Janda, the wind had picked up so not many birds were on show there. **White Storks** were plentiful and good numbers of both **Pallid & Common Swifts** screamed above us but not much else. We did see a few **Purple Swamphens, Grey Heron, Cattle Egrets** and **Corn Buntings**. We ate our picnic lunch along the Benalup track where we found **Common Pheasant, Black Kite** and we heard a **Cetti's Warbler**.

Next we drove to Vejer to look for the introduced and 'now breeding' **bald Ibis**, there were four nests with accompanying birds in attendance. The nearby marshes at Barbate held a good number of **Glossy Ibis, Purple Swamphen, Moorhen**, a single Wood Sandpiper and lots of Black-winged Stilts.

We made a short stop at the Sierra de la Plata where we looked for **Little Swifts** but all we found was a pair of

Blue Rock Thrushes and a Griffon Vulture.

Lastly we returned to Los Lances, after we had heard of a rarity for Spain, in the shape of a **Cream-coloured Courser**. We all had excellent views of this little gem and it was a great bird to end the day with.

DAY 4 - APRIL 18th 2012

GAUCIN – EL ROCIO (COTO DOÑANA) VIA – LAGUNA MEDINA – SANLUCAR/BONANZA SALT PANS AND TREBUJENA MARSHES.

Today we transferred from the mountains of Andalucia to the ‘flat-lands of Coto Doñana. We set off at 8:30am and headed for the coast along the road to San Roque via Jimena, it was dull and overcast as we left Gaucin. Our first stop was at a railway bridge just passed Estacion de Jimena where we watched a dozen or so of **Lesser Kestrels** as they attended their nests in the bridge wall, a few **Jackdaws** joined the kestrels in competition for their choice of nest sites.

Our next stop was an hour later as we approached Jerez, the Laguna Medina is always a good place to stop off when heading for Sevilla. The water had its usual crowd of **Common Coot, Great-crested Grebe, Black-necked Grebe, Shoveler, Gadwall** and **Mallard**. There was an exceptional number of both **Common** and **Red-crested Pochards** as well as **Moorhen, Little Grebe** and a few **Yellow-legged Gulls**. In the tamarisk and reedy scrub we found **Great Reed** and **Reed Warblers** and we had excellent sightings of both **Cetti’s Warbler** and **Common Nightingale**. Other birds seen were **Yellow Wagtail, Zitting Cisticola, Corn Bunting, Stonechat, Garden Warbler, Blackcap** and **Serin**.

After a lunch stop in a venta near Puerto Maria we set off for the salt pans at Bonanza, along the way we made a quick stop at the river Rio Guadalquivir near Sanlucar where we saw **Little Egret, Yellow-legged Gull, Ruddy Turnstone** and our first **Lesser-black Backed Gull**. The salt pans at Bonanza were a little disappointing but we did enjoy seeing **Slender-billed Gull, Little Tern, Whiskered Tern** and hundreds of **Avocets** at close range. Despite there being a lack of good numbers of waders we did see: small numbers of **Dunlin, Curlew Sandpiper, Sanderling, Black-winged Stilt, Common Sandpiper, Black-tailed Godwit** as well as **Eurasian Spoonbill, Greater Flamingo, Glossy Ibis, Black Kite, Common Buzzard** and **Common Shelduck**.

Next stop was the Laguna Tarelo where we struck lucky with a number of excellent species, the best of which was **Marbled Duck** (2), **White-headed Duck** (6), **Night Heron, Squacco Heron, Red-crested Pochard, Common Pochard, Shoveler, Gadwall** and **Cattle Egret** (nesting colony).

LAGUNA TARELO - where we saw both **Marbled Duck** and **White-headed Duck**

The drive through Algaida Pine Woods was uneventful except for a fly-over **Booted Eagle** but the marshes at Trebujena produced a number of species the best of which was a single **Red Kite**, a single **Great White Egret** and a superb male **Montagu’s Harrier**.

We passed through Sevilla without a hitch and arrived at El Rocio at 6pm, a few journey birds added to our list

included; **Common Raven**, **Eurasian Magpie**, **Azure-winged Magpie**, many **Corn Buntings** and a dozen or so of **Woodchat Shrikes**.

We all checked into our hotel which overlooked the Laguna de Madre at El Rocio where a lot of birds were present; we left them for tomorrow and retired from birding for the day.

DAY 5 - APRIL 19th 2012

EL ROCIO (LAGUNA DE MARISMA DE LA MADRE) – LA ROCINA – ACEBUCHE – EL ROCIO

We had spells of clear skies and overcast conditions but it didn't rain until 5pm! We started at 9am after a scramble for breakfast as there were many other birders staying at the Hotel. A quick look at the Laguna situated right outside the hotel revealed many species but they were all on the far side of the water, so we jumped into the bus and drove round to them as they certainly weren't coming to us!

EURASIAN SPOONBILLS

Hundreds of waders were feeding in the shallow water, they included **Curlew Sandpiper** (100+ with many in summer plumage), **Dunlin**, **Ruff** (at least one showing a great deal of a coloured 'Ruff'), **Little Stint**, **Ringed Plover**, **Avocet**, **Black-winged Stilt**, many **Eurasian Spoonbills**, **Greater flamingos**, **Mallard**, **Shoveler**, **Gadwall** and **Common Coot**. There were also several **White Storks**, **Grey Herons** and lots of **Black Kites** overhead, a few hundred **Sand Martins** joined the **Barn Swallows** and **House Martins** feeding over the water.

THE UBIQUITOUS - WOODCHAT SHRIKE

Several new hides are now in place just south of El Rocio but are best visited in the afternoon with sun behind you, we found it difficult to view the birds in the morning, We walked south along a sandy track and came across a small pool which held **Common Sandpiper** and a **Spotted Redshank** which was in the process of changing from winter to summer plumage.

A little further along the track we located a great bird for the trip list, a **Red-knobbed Coot**, it took a long time for everyone in the group to see it properly but we all eventually saw it out in the open. Whilst we were watching the 'Coot', a second bird was located. What luck! This rare Coot is difficult to see in good light never mind trying to see it with the sun behind it!

RED-CRESTED POCHARD

Next we walked across the main El Rocio to Matalascanas road to La Rocina Nature Reserve where we visited several hides and walked through some pine woodland with thick scrub over a stream. From the hides we found our first **Purple Heron** and in the woods we heard **Bonelli's Warbler**, **Iberian Chiffchaff** and **Tree Sparrow** but only got glimpses of them. A Party of **Long-tailed Tits** showed better as did a **Common Nightingale**, **Chaffinch**, **Greenfinch** and **Goldfinch**.

We had a similar experience when scanning the marsh from a board-walk; we could hear **Savi's Warbler** and **Reed Warbler** but only got glimpses of them. A group of **Night Herons** showed much better.

Further along the walk we had good views of **Wren**, **Bee-eater**, **Marsh Harrier** (a couple of superb males), a **Hoopoe** was elusive and we heard a **Common Cuckoo**, the first of the year for most of the group.

We drove down to the visitor's centre at Acebuche where we ate lunch in their superb restaurant. By the time we finished lunch the wind had picked up and made birding difficult but we did see **Common** and **Azure-winged Magpies** very well, two more **Hoopoes**, **Stonechats**, **Great Tit**, **Red-rumped Swallows** and lots of **Pallid Swifts**. From the hides we watched many **Red-crested Pochard**, **Common Pochard**, **Little Grebe**, **Eurasian Spoonbill**, **Purple Heron (4)**, **Glossy Ibis** and lots of **Black Kites**.

SPOTTED REDSHANK - showing shades of summer plumage

It was now 4pm and many of the group opted to go back to the hotel, it had clouded over and rain threatened. Three of us went back out to view the Laguna de Madre from the west side but the light got a little dull. We did add **Black-tailed Godwit** and **Whimbrel** to our day list but it started to rain so we called it day at 5pm.

DAY 6 - APRIL 20th 2012

EI ROCIO – CORREDOR DE VERDE – DEHESA ABAJO – JOSE VALVERDE CENTRE (NORTHERN MARSHES)

A rain free day with a cloudless morning and overcast afternoon, it felt warm when out of the breeze.

We drove the 20km to Villamonrique and then turned onto dirt tracks that ran along the Corredor de Verde. We noted **White Stork**, the ubiquitous **Black Kite**, **Common Buzzard**, **Bee-eater**, **Crested Lark**, **Common** & **Azure-winged Magpies** and plenty of **Woodchat Shrikes** before we stopped the bus for our first walk. In

fact we never reached our destination because we found our target species before we got there! A **Black-winged Kite** was seen from the bus and we all jumped out to get superb views of this lovely little raptor, we watched it for 10 minutes before it drifted off in its' delightful kite-like manner.

We made another couple of stops along the Coredor de Verde where we saw more **Bee-eaters** and **White Storks**; we also heard a **Common Cuckoo** and noted both **Booted** and **Short-toed Eagles** up in the blue sky.

A VIEW OF EL ROCIO FROM ACROSS THE LAGUNA MADRE DE LAS MARISMAS

The eucalyptus wood at Dehesa de Pilas had its usual colony of **Spanish Sparrows**, there must be over 1000 pairs, the noise is deafening. Most of the sparrows we flying off into the fields and returning with a mouth full of grass, some struggled with large grass stalks, I wonder how

many kilos of grass it takes to build 500 nests?? Over 50 **Bee-eaters** were milling around and we saw a couple of **Montagu's Harriers** as well.

At Dehesa Abajo the lake was full of birds but as usual they were a mile away on the far side, however we did get good views of **Little & Cattle Egrets**, some roosting **Night Herons** and on the water we saw **Purple Swamphens**, **Common Pochard**, **Shoveler**, **Gadwall**, **Black-winged Stilts**, **Spoonbills**, **Greater Flamingos** and **Great Cormorants (sinensis)**. There were also lots of grebes, both **Great-crested** and the **Little** varieties. In the distance we could see many **Whiskered Terns**, **Jackdaws**, **White Storks** and **Black Kites**.

We stopped at a Venta and had a tapas lunch before setting off towards the Valverde Centre, we made a couple of stops to watch **Lesser Short-toed** and **Short-toed Larks**, **Calandra Lark**, **Yellow Wagtail**, **Corn Bunting & Montagu's Harrier**. As we approached the Valverde Centre we stopped to view the large lake on our right which held hundreds of birds. There were over 100 **Ringed Plover**, **Common Redshank** (50+), **Common Greenshank** (4), **Spotted Redshank** (15 – some in pure black plumage!), and smaller numbers of **Curlew Sandpiper**, **Common Sandpiper**, **Dunlin**, **Kentish Plover**, **Avocet**, **Whimbrel**, **White Wagtail**, **Yellow Wagtail**, **Glossy Ibis**, **Eurasian Spoonbill**, **Whiskered Tern** and **Greater Flamingo**. We also saw **Grey & Purple Herons**, **Great Egret**, **Little Egret** and **White Stork**, the lake was buzzing with bird-life an excellent place to stop.

We then took the track that leads back to El Rocio and found our first **Collared Pratincoles** of the trip, we also saw a bizarre sight of over 300 **Whiskered Terns** quartering a field in one huge flock and diving to the ground to collect insects as and when they found them, extraordinary!!

Next we dropped into the visitors centre for a caffeine top up and some 'birding-behind-plate-glass'. We had good close views of **Great Reed Warbler**, **Purple Swamphen**, **Little Grebe** and **Common Pochard** but not much else.

Our drive back to El Rocio was interrupted only once when we stopped to view a known **Spanish Imperial Eagle's** nest site, this proved successful as two birds were seen around the nest, distant but identifiable. During this homeward journey we also saw **Tawny Pipit**, several **Purple Herons**, **Great White Egrets** and two **Marsh Harriers**.

A last look at the Laguna at El Rocio produced 2 new birds for the trip in the shape of **Gull-billed Tern** (14) and **Green Sandpiper** (1). We had logged 86 species today which is a fair reflection of the current dry status of Doñana. The drought does have one advantage, it tends to concentrate the birds at the larger Lagunas that still hold water.

GREAT FLAMINGOS AT EL ROCIO

DAY 7 - APRIL 21st 2012

EL ROCIO - MATALASCANAS - HUELVA - LAGUNA PRIMERA DE LOS PALOS - MARISMAS DE O'DIEL NATURAL PARK.

Our best day yet with the weather! a cloudless sky with very light winds. We set off for Huelva after breakfast but we made a quick stop to look at the El Roico Laguna to search for the **Gull-billed Terns** seen last night. The terns were not there but we did find a **Common Teal** and we had a great sighting of **9 Little Gulls** that flew over the Laguna, they did not stay but we all had good views of them.

At Matalascanas we spent a short time looking out to sea from the cliffs hoping for some migrant passage. All we found were a number of **Northern Gannets**, lots of Yellow-legged and Lesser Black-backed Gulls and a Hoopoe came in off the sea.

Just outside of Huelva we stopped to look at the Laguna de los Palos, this small body of water usually holds a good selection of birds. Today was a little disappointing but we did see **Gadwall**, **Shoveler**, **Common** and **Red-crested Pochard**, **Purple Swamphen**, **Squacco Heron**, **Purple Heron** and lots of **Common Coots**.

We then drove through the port of Huelva and round to the Marismas de O'diel, this 'island' runs some 30km and is parallel to the Huelva shoreline. The whole marsh is superb with hundreds of hectares of salt marsh, open lagoons, salt pans, beach, stone pine woodland and shingle banks. We started at the small lagoon at the Calatilla Restaurant. There we had excellent views of a **Red-knobbed Coot**, the bird swam in front of us just a few meters out. Then a **Little Bittern** flew across the pool, it was the one and only sighting of this species. Many other birds were on the water and included: **Eurasian**

Spoonbill, **Greater Flamingo**, **Gadwall**, **Shoveler**, **Common Pochard**, **Little Grebe**, **Black-winged Stilts** and **Common Sandpiper**.

Over the next 2 hours we drove towards the 'tip' of the island and stopped several times to look at thousands of waders. The tide was low and huge areas of mud were exposed where we found several new species for the trip. **Grey Plover, Eurasian Curlew, Bar-tailed Godwit, Oystercatcher** and **Stone Curlew** were all new. This raised our total of wader species recorded during the trip to an impressive 25.

A large flock of **Little Terns** numbering over 170 was really nice to see and an **Ortolan Bunting** was a terrific find on the way out of the reserve.

We ate our picnic lunch sitting on a grassy bank in warm sunlight and then at 1pm we set off for the long journey back to Gaucin. We went via Sevilla and Ronda. At Ronda we spent some time in the centre where a short stop at the famous Ronda Bridge was enjoyed by the group

We arrived back at Gaucin in the late afternoon around 6pm and decided to rest and not to do any further birding.

That concluded the tour as we had to set off for Malaga Airport early in the morning. We had seen 154 species and heard 2 more. It was a great effort by the group and spoilt only by adverse weather for the first 3-4 days of the trip. Strong winds, cold and wet days are not conducive to good birding!!

1	Common Shelduck
2	Mallard
3	Gadwall
4	Northern Shoveler
5	Marbled Duck
6	Teal
7	Red-crested Pochard
8	Common Pochard
9	White-headed Duck
10	Red-legged Partridge
11	Common Pheasant
12	Black-necked Grebe
13	Little Grebe
14	Great Crested Grebe
15	Northern Gannet
16	Great Cormorant
17	Little Bittern
18	Night-Heron
19	Cattle Egret
20	Squacco Heron
21	Little Egret
22	Great Egret
23	Grey Heron
24	Purple Heron
25	White Stork
26	Black Stork
27	Glossy Ibis
28	Bald Ibis
29	Eurasian Spoonbill
30	Greater Flamingo
31	Eurasian Griffon Vulture
32	Spanish Imperial Eagle

33	Short-toed Snake-Eagle
34	Booted Eagle
35	Bonelli's Eagle
36	Red Kite
37	Black Kite
38	Western Marsh-Harrier
39	Montagu's Harrier
40	Common Buzzard
41	Eurasian Sparrowhawk
42	Black-winged Kite
43	Common Kestrel
44	Lesser Kestrel
45	Common Moorhen
46	Common Coot
47	Red-knobbed Coot
48	Purple Swamphen
49	Eurasian Oystercatcher
50	Pied Avocet
51	Black-winged Stilt
52	Eurasian Stone-Curlew
53	Collared Pratincole
54	Cream Coloured Courser
55	Little Ringed Plover
56	Common Ringed Plover
57	Kentish Plover
58	Grey Plover
59	Sanderling
60	Ruddy Turnstone
61	Dunlin
62	Curlew Sandpiper
63	Little Stint
64	Wood Sandpiper
65	Green Sandpiper
66	Common Sandpiper
67	Common Redshank
68	Spotted Redshank
69	Common Greenshank
70	Black-tailed Godwit
71	Bar-tailed Godwit
72	Eurasian Curlew
73	Whimbrel
74	Common Snipe
75	Ruff
76	Black-headed Gull
77	Slender-billed Gull
78	Mediterranean Gull
79	Yellow-legged Gull
80	Audouin's Gull
81	Lesser Black-backed Gull
82	Little Gull
83	Little Tern
84	Gull-billed Tern
85	Whiskered Tern
86	Rock Dove
87	Feral Pigeon
88	Common Wood-Pigeon
89	Eurasian Collared-Dove
90	European Turtle-Dove
91	Common Cuckoo (H)

92	Little Owl
